

Special Issue

Parenting and Child/Adolescent Development: Current Updates and Global Perspectives (2nd Edition)

Message from the Guest Editors

Family dynamics, parenting practices, and parent/caregiver–child relationships have a formative effect and long-term implications for children’s health, well-being, and socioemotional, cognitive, and neurobiological development, including in the later stages of life. Family connectedness, communication, and relationships with parents and family members also provide important role models and contribute to the development of identity and the adoption of skills and behaviours in adolescence. This Special Issue takes a multidisciplinary stance and aims to collect theoretical, methodological, and empirical papers on topics related to the following: the influence of family type, structure, and dynamics; the gendered aspect of parenting and care for children and adolescents, i.e. the role of mothers’ and fathers’ involvement and parenting practices, and their implications for child/adolescent development, health, and well-being; the involvement of extended family members in care for children and adolescents.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
